

HOW TO DO THESE EXERCISES

In this section, you'll build real automations. There are 3 ways you can do the exercises:

1. Try it on Your Own First

At the start of each video, I show you the finished automation. You can pause the video, look at the file, and try to build it yourself. Then, play the video and compare how I did it.

2. Build Together with Me (Recommended)

Watch the video and build the automation step by step with me. I explain everything, and it's a great way to learn.

3. Watch First, Then Build

If you like to see the whole process first, just watch the video, then build the automation after.
