

EXERCISE: CREATE AN AI AGENT PROMPT

Objective

In this exercise, you will design a complete AI Agent Prompt from scratch. Your agent must be able to gather information, process it, create and update a document, and then deliver the results via email.

Provided Tools

You will design your agent's instructions using the following available tools:

- Get News – Fetches the latest news on a specific topic.
- Create Document – Creates a new Google Docs file.
- Update Document – Updates an existing Google Docs file with content.
- Send a Message – Sends an email with structured content.

Task Flow

Your AI Agent should be able to do the following in sequence (next page):

EXERCISE: CREATE AN AI AGENT PROMPT

1. **Fetch News:** Use Get News to collect recent articles on a given topic.
2. **Summarize Content:** Use OpenAI to generate a clear, concise summary of the fetched news.
3. **Create Document:** Use Create Document to generate a new Google Doc.
 - The document title must follow the format: “News for [Day] [Month] [Year]”. Example: “News for 15th August 2025”.
4. **Update Document:** Use Upload Document to insert the AI-generated summary into the created Google Doc.
5. **Send Email:** Use Send a Message to deliver the summary in a well-structured email to the user.
