

EXERCISE: USE CUSTOM GPT FOR PROMPTING

Objective

In this exercise, you will practice creating custom AI Agent instructions using the Instruction-Maker Custom GPT.

👉 [Get Access Here](#)

The main task is to **design instructions for one of the three cases provided**. You may also build the full agent if you'd like, but that part is optional.

Instructions

1. Open the Custom GPT at the link above.
2. Choose one of the three cases below.
3. Use the GPT to generate the agent instructions for your chosen case.
4. Refine the instructions if needed, then copy them into your notes or share them.

EXERCISE: USE CUSTOM GPT FOR PROMPTING

Cases to Choose From

Case 1: Your Own Idea

- Define an AI Agent based on your own creativity, needs, or curiosity.
- This could be a personal assistant, a creative helper, a tool-based executor, or anything you imagine.

Case 2: Research Summarizer Agent

- Purpose: Collects research papers or articles on a given topic, summarizes them, and outputs a concise 1-page study note.
- Tools: Web Search, OpenAI, Create Document.
- Deliverable: Well-structured notes with headings, key insights, and references.

Case 3: Productivity Coach Agent

- Purpose: Helps users manage daily tasks, track habits, and recommend improvements.
- Tools: OpenAI, Create Document, Send a Message.
- Deliverable: A daily productivity report with tasks completed, habits logged, and motivational tips.

Share Your Work

Once finished, you can share your results in [AI Enthusiasts - our free student community](#).
