

# Resources from this lesson

## Claude + MCP

### MCP Server Code

- **GitHub:** [Model Context Protocol Servers](#)

### Remote MCP Connector Guides

- **Getting Started:** [Claude – Getting Started with Custom Connectors Using Remote MCP](#)
- **Pre-Built Connectors:** [Claude – Pre-Built Connectors Using Remote MCP](#)
- **Build Your Own:** [Building Custom Connectors via Remote MCP Servers](#)
- **Claude Desktop App:** [Download Claude](#)

## Model Context Protocol (MCP) Resources

### General Introduction

- **Website:** [modelcontextprotocol.io](https://modelcontextprotocol.io) - Introduction

*High-level overview of MCP — standardizing function calling and agent communication for interoperable AI.*

### Google Gemini

- **Gemini Docs:** [MCP with Google Gemini API](#)

*Example implementation of Model Context Protocol for meetings using Gemini's function calling.*

## LLM Apps vs RAG vs AI Agents

- **Article:** [LLM Apps vs RAG vs AI Agents — What's the Real Difference?](#)

*Covers the conceptual differences between simple LLM apps, Retrieval-Augmented Generation (RAG) systems, and more autonomous AI Agents.*

---

## OpenAI's Connector System (ChatGPT)

- **Article:** [Connectors in ChatGPT](#)

*OpenAI's implementation of integrations using its own connector system, enabling ChatGPT to take action and connect to tools, APIs, or platforms.*
